

Luxembourg, 19th May 2022

The Luxembourg Tech School (LTS) is looking for its new “Future Digital Leader” Students Cohort.
After training more than 650 students, the LTS is opening registration for the 2022-2023 school year.

The Luxembourg Tech School (LTS) is entering its 7th year of activity with the launch of its dedicated programs in 2022-2023, focusing on Creative Coding, Game Dev, Big Data, Financial Technologies, Space Resources, Robotics and Artificial Intelligence. **The registrations are now [open](#)**

What is the LTS?

The LTS is an extracurricular educational concept that facilitates and supports the development of future Digital Leaders. It is aimed at 12- to 19-year-old students who are passionate about the digital realm and eager to learn and apply technology in a creative and business context.

650 students trained and more to come

Since 2016, more than 650 students in Luxembourg, from lycées across the country, have gone through the programs and successfully graduated as “Future Digital Leaders”.

For the upcoming 2022-2023 school year, the LTS Team is looking for a new student’s cohort, for the following levels of the curriculum:

- Level G0, suitable for students between 12 to 14 years, no coding knowledge required. Modules: Creative Coding, Digital Thinking, Interaction Design.
- Level One, suitable for students between 15 to 19 years, no coding knowledge required. Modules: Game Dev, Big Data, Financial Technologies.

The registrations are now [open](#) for both levels and will close on the 24th of June.

Sergio Coronado, Founder of LTS, commented: *“After six years, I am always excited to see the LTS registration open for the upcoming school year. Students of each of our programs are thriving in this adventure, learning teamwork, problem-solving, leading with tech and developing ideas.”*

Sara Kaiser, Program Director at LTS, added: *“The LTS registrations for the upcoming school year are now open until the 24th of June. It is not to be missed. Students of our programs follow creativity, business and technology-driven courses divided into thematic modules. They get personalised coaching, have the chance to get in touch with industry experts and work on their own projects, which they showcase at the end of each module.”*

More information about LTS and the registrations for the "Future Digital Leaders" and "Digital Creators" programs are open here: <https://www.techschool.lu/registration>
